EDUCATION

Bachelor of Information Technology

September 2017 - September 2020

Zagreb University Of Applied Sciences

EXPERIENCE

Junior Full Stack Software Developer

February 2020 - July 2020

Omega Software

Worked on creating and maintaining enterprise Web Applications using C# (.NET Core) and Javascript (jQuery, Angular). Most notably I have worked on the [e-fondovi](#) app and helped to improve their mentorship program.

SKILLS

Frontend: HTML/CSS (Bootstrap), Javascript (jQuery), Angular

Backend/Desktop: C, C++, C#, .NET Core, Python, PHP

Other: Git(Git Flow), code testing (unit tests, ect), native Croatian and fluent English, driver's licence, Postman, Agile (SCRUM)

Fast learner, quick to fit in and always looking to expand my skill set.

NOTABLE PROJECTS

Mr Robot Webshop

Single page AJAX Web Application made using .NET Core as the backend and HTML/CSS along with Javascript/JQuery as the frontend used to manage and sell products. It was created for my bachelor's thesis. It got awarded an A by every single member of the commission.

Menza Scraper

Web Scraping tool created in C# using Windows Forms. It uses an exploit to scrape [SRCE](#) and get receipt data for restaurant visits of any student as long as you have their JMBAG number. This was my final project for the "Object Oriented Programming 2" class and it scored an A.

See these projects in action and their code on [my website](#).
