SOME PROJECTS

Mr Robot Webshop

Proof of concept for a PC parts webshop developed using modern technologies. It was created for my bachelor's thesis and got graded with an A by every single member of the commission.

Skills used: C#, .NET Core, HTML/CSS, Bootstrap, JavaScript, JQuery, SQL, Entity Framework

Menza Scraper

Desktop web scraping application. It scrapes [SRCE](#) and gets receipt data (restaurant visit times, what they ate, ect.) from any targeted group of croatian students. The scraped data is saved into an XML document. This was my final project for the Object Oriented Programming II class in which it scored an A.

Skills used: C#, HTTP, Windows Forms, HTML Agility Scraper, XML

See these projects in action, their code and others on [my website](#).
